

Senior AI Engineer with 10+ years experience building award-winning systems across fintech, healthcare, and national security.

Founder & AI Engineer ▪ Spirit & Hammer

October 2025 - Present

Technologies: *Next.js, React, TypeScript, Python, FastAPI, Vercel AI SDK, OpenRouter, Claude, Three.js, Cloudflare, Swift, Playwright, LLM*

- Architected full-stack features and end-to-end AI agent harness-orchestration, MCP server integration, and skills-for security startup [Intruex](#), contributing to the platform that won the company's first government contract.
- Shipped [Sun Signal](#), a circadian-health platform delivering real-time daily timing guidance for any US ZIP, built on a 50K-LOC FastAPI engine, AI chat, and dynamic Vercel AI UI components serving its first thousand users.
- Architected a AI video pipeline & Youtube player platform cutting Youtube per-video production time by 90% and lifting usability satisfaction by 50%.
- Delivered a full personal-brand platform-blog, newsletter, and lead capture on Lovable for relationship coach [Hans Morningstar](#) so edits are done by the client live on the site directly through natural language saving \$1000/mo dev costs and capturing leads in the first week.
- Engineered offline-first apps on Vercel & Cloudflare with agentic workflows and MCP server and skills, delivering distributed databases, conflict resolution, and custom HMAC magic-link auth driven through SSE-streaming AI chat for niche use cases.

Principal Software Engineer ▪ Capital One

Jan 2021 to Dec 2021, Aug 2024 to Oct 2025

Technologies: *Java, JavaScript, TypeScript, SolidJS, React, Angular, Spring Boot, AWS, Docker, Git, REST APIs, JUnit, AI Tools, Co-Pilot*

- Generated millions in revenue by delivering Auto Navigator Trade-In in two months with an understaffed team-led cross-functional alignment and architected scalable document upload.
- Built full-stack features (Trade-In, Auto Loan Rates, Search) serving millions of users with React, SolidJS, Angular, and Spring Boot microservices on AWS.
- Cut code-review cycles 40% and eliminated 100K API failures by leading cybersecurity remediation as Duty Champion with automated security testing.
- Enabled zero-defect deployments for 3M+ daily users modernizing legacy Angular codebases with automated testing and releases.
- Won a company-wide hackathon for UX design and frontend implementation.

Senior Software Engineer ▪ Publicis Sapient

April 2022 to May 2023

Technologies: *Angular, TypeScript, Java, Spring Boot, AWS, ArcGIS, Kubernetes, REST APIs, Junit*

- Built interactive healthcare facility mapping using ArcGIS and Angular, enabling healthcare officials to map out providers across regions - increasing healthcare access by 20% across underserved regions.
- Led code review standardization and mentorship programs, reducing defect rates by 33% and establishing quality benchmarks adopted company-wide.
- Designed and implemented Angular Material UI component library for consistent cross-team design patterns, accelerating feature delivery timelines.

Senior Software Engineer ▪ Maxar Technologies

Dec 2018 to Apr 2022

Technologies: *Angular, TypeScript, Java, Spring Boot, AWS, Kubernetes, REST APIs, Junit*

- Supported national decision-makers by engineering distributed Angular apps for geospatial mapping and probability simulation.
- Enabled rapid analysis of high-volume data by building real-time visualization with parallel processing in modern JS frameworks.
- Drove adoption of complex engineering solutions by partnering with technical and business stakeholders to validate requirements and deliver technical demos.

Software Engineer ▪ Americas Cooperatives

Jan 2016 to Dec 2016

Certifications: Claude Certified Architect (June 2026), John Hopkins Agentic AI, AWS Certified Solutions Architect

AI & ML: Agentic AI, RAG Pipelines, ML, LLM, Claude, Claude Code, Claude Certified Architect (June 2026), OpenRouter, AI SDK

Languages: Java, Kotlin, Typescript, JavaScript, Python, Node.js

Frontend: React, Angular, SolidJS, RxJS & NgRx, geospatial mapping (ArcGIS, Cesium.js, Leaflet.js, Google Maps API)

Backend & Data: Spring Boot, Flask, REST, Microservices, PostgreSQL, MongoDB, NoSQL, distributed systems, parallel computing

Cloud, Devops & Testing: AWS (Certified Solutions Architect), Docker, Kubernetes, CI/CD, Git, Junit/Jest/Selenium, TDD/BDD

Bachelors of Science, Electrical Engineering
